EXPERIENCE

• JPMorganChase

Software Engineer II (Full-time)

Aug 2023 - Present

- Designed and developed **distributed credit card systems** handling **millions of real-time transactions daily**, improving performance and reducing latency.
- Led **end-to-end migration from on-premise infrastructure to AWS**, enabling **elastic auto-scaling** during peak traffic and improving system resilience.
- Designed and deployed **Java Spring Boot microservices** on **AWS ECS Fargate**, developing **REST and GraphQL APIs** for scalable client-driven data retrieval.
- Built an **event-driven architecture using Kafka**, enabling **asynchronous processing of millions of events daily**.
- Developed an **AI-powered financial document processing platform** using **Python, FastAPI, Docling, and Azure OpenAI** to parse bank statements and generate structured ledger outputs.
- Integrated **Azure OpenAI LLMs** with configurable prompts, business rules, and **JSON Schema validation** to extract, classify, and validate financial data.
- Contributed to **React-based frontend development**, building reusable UI components and integrating **REST and GraphQL APIs** to deliver end-to-end features across distributed services.
- Developed **component and integration test frameworks** using **Hoverfly, AWS Simulator, and Cucumber**, reducing regression issues and improving service reliability.
- Conducted **performance and load testing** using **JMeter and BlazeMeter** and implemented **observability** with **Splunk, Datadog, and Dynatrace**, improving monitoring, debugging, and incident resolution.
- Built and optimized **CI/CD pipelines** using **Jenkins, Docker, Spinnaker, and Terraform**, implementing **blue-green deployments** for zero-downtime releases.

• Cybage Software

Software Engineer (Full-time)

June 2021 - Aug 2023

- Reduced **75% manual operational effort** by automating supply chain workflows across distributed warehouse systems, improving efficiency and reliability.
- Engineered and maintained **Spring Boot-based services**, supported critical business operations, and managed production schedules and expedited changes across multiple systems.
- Owned **production support and incident resolution processes**, performing log analysis and troubleshooting across distributed components and servers.
- Improved system performance through targeted optimizations and custom scripts, increasing overall stability and throughput.

SKILLS

Languages: Java, Python, SQL

Frameworks: Spring Boot, FastAPI, Hibernate, REST APIs, GraphQL, React

AI / GenAI: Azure OpenAI, Docling, LLM Integration, Prompt Engineering, AI Agents

Testing: Cucumber, Hoverfly, AWS Simulators, JMeter, BlazeMeter

Core CS: Data Structures & Algorithms, Object-Oriented Programming

System Design: Domain-Driven Design (DDD), Event-Driven Systems, Design Patterns, Microservices Architecture

Cloud & DevOps: AWS, Terraform, Docker, Jenkins (CI/CD), Jules, Spinnaker, Git

Databases & Messaging: Aurora PostgreSQL, Oracle Database, DynamoDB, Kafka

Observability: Splunk, Datadog, Dynatrace

CERTIFICATES

- AWS Certified Generative AI Developer
- AWS Certified Solutions Architect
- AWS Certified Cloud Practitioner
- FinOps Certified Practitioner

EDUCATION

CDAC MET Bandra

PG Diploma in Advanced Computing

Feb 2020 - Jan 2021

University Of Mumbai

Bachelor of Technology in Information Technology

July 2014 - May 2019
